

SYNTHETIC DEMO DATA - NOT A REAL COMPANY DOCUMENT

ENGINEERING STANDARD ENG-STD-07

Code Review and Testing Standard | Revision 2 | Effective 1 March 2026

1. PURPOSE

1.1 This standard sets the minimum testing and review requirements for software used in plant utilities, calculators and reporting tools.

2. TESTING

2.1 Every function must have at least one automated test.

2.2 A value that equals a limit must be tested explicitly. A reading exactly at the limit is within the limit, and the test suite must confirm this.

2.3 A change may not be released while any automated test is failing.

SYNTHETIC DEMO DATA - NOT A REAL COMPANY DOCUMENT

(continued)

3. REVIEW

3.1 Changes to safety-related calculations need a second reviewer.

3.2 Plant utilities must not make network calls. All data stays on site.

4. RECORDS

4.1 The test run output is kept with the change record.
